RE: Soviet Visitors

Gentlemen:

As I had informed some of you, the visit of the Soviet delegation was postponed by one week. For least confusion, we have inverted the order of their visits between the East and West Coasts. The order and dates for visits to the East Coast- Cambridge, Cincinnati, Pittshurgh remain the same and on the same dates. The order and dates of visits on the West Coast are somewhat modified- Los Angeles-San Francisco-Portland and directly to New York. The revised schedule is attached.

Again, my sincere thanks for all your efforts.

Sincerely yours,

R. F. Bunshah, Chairman

Task Force on Electron Beam Evaporation

REVISED ITENARY FOR VISIT OF USSR DELEGATION - TASK FORCE ELECTRON BEAM EVAPORATION

Visitors are: Prof. B.A. Movchan, Dr. A.V. Demchishin, Dr. L.V. Kovalchuk, Paton Welding Institute, Kiev; Dr. V.N. Andreev, All Union Scientific Research Instrumental Institute; and Mr. S.N. Glebov, State Committee on Science and Technology. Airline reservations have been made and confirmed for flights in the U.S. We expect that Mr. Alexis B. Tatischeff will act as interpretor for the U.S. side and accompany the visitors during their entire visit.

December 7, Sunday:

Arrival by Aeroflot 313 from Moscow 6:30 pm. Holiday Inn-LaGuardia Airport area. Alex Tatischeff will meet the flight.

December 8, Monday:

New York (La Guardia) - Boston AA384 Leave 8:30 am, arrive 9:23 am Visit Manlabs, Dr. Larry Kaufmann will pick up at airport. 21 Erie Street, Cambridge, Mass. 02139 (617) 491-2900.

Boston-Cincinnati, American 453 Leave 5:40 pm, Arrive 8:45 pm. Proceed by taxi to Quality Inn Central, 4147 Montgomery, Norwood, Ohio

December 9, Tuesday

Visit Metcut Research Associates.
Picked up at hotel by Dr. Michael Field,
3980 Rosslyn Drive, Cincinnati, Ohio 45909,
(513) 271-5100

Cincinnati-Pittsburgh, TWA 532 Leave 1 pm, Arrive 1:50 pm Proceed to Webster Hall Hotel. Dr. Laughlin will meet party on arrival.

December 10, Wednesday

Visit Carnegie Mellon University, Dr. Dick Heckel and Dr. Lloyd Bauer, Schenley Park, Pittsburgh, PA 15213, (412) 828-5023.

December 11, Thursday

Visit Teledyne Firth Stirling, Dr. Law McCabe, 4 Parkway Center, Pittsburgh, PA 15220 (412) 922-9602

December 12, Friday

University of Pittsburgh, Dr. Hal Brody and Dr. G.H. Meier, 848 Benedum Hall, Pittsburgh, PA 15213 (412) 624-5302.

December 13, Saturday

Pittsburgh-Los Angeles, TWA 53 Leave 6:30 pm, Arrive 8:34 pm Dr. Bunshah will meet the Flight. Hotel Claremont, West Los Angeles

Approved For Release 2001/08/27 : CIA-RDP79-00798A000300070006-2

December 14, Sunday

December 15, Monday

December 16, Tuesday

December 17, Wednesday

December 18, Thursday

December 19, Friday

Rest in Los Angeles

Visit Prof. Bunshah at UCLA, 6532 Boelter Hall, Los Angeles, CA 90024, (213) 825-2210 office, (213) 398-6506 home

Los Angeles-San Francisco, United 506 Leave 9 am, Arrive 10 am. Hilton Inn, San Francisco Airport. Visit Airco Temescal, Dr. Russel Hill 2850 Seventh, Berkeley, California (415) 841-5720

Picked up by Dr. Troy Barbee
(1) Visit Industrial Vacuum Engineering,
Dr. Hugh Smith, 307 North Amphlett Blvd.,
San Mateo, CA 94401 (415) 348-2866.
(2) Visit Stanford University, Center for
Materials Research, Stanford, CA 94305
Dr. Troy Barbee, Jr. (415) 497-2300 x 4118
(3) Dinner with Dr. Charles Hunt

San Francisco-Portland, United 482 Leave 8:15 am, Arrive 9:45 am Dr. Erwin Rudy will meet the plane. Visit Dr. Erwin Rudy, Oregon Graduate Center, 19600 N.W. Wilke Road, Beaverton, Ore. 97005 (503) 645-1121. Possibly U.S. Bureau of Mines Hotel Mendel, Portland

Portland-New York (Kennedy), United 40 Leave 7:20 am, Arrive 4:40 pm Connect to Aeroflot to Moscow

	6. To develop quantitative models to describe the variation of stresses near an interface.	Effects of thermal stresses and diffusion processes will be considered. Bulk specimens and thi film couples will be used to mak experimental measurements (Fe-Ni-Al).		1. Investigation on models by means of holography of the str field at the tip of a crack propagating from a barrier coating into a fibre taking in to account residual stresses in the components of composite materials.	2. Investigation of the development of residual stresses as their effect on strength of composite materials such as Al-B and Ni-W as a result of diffusional degradation (US) as such as Al-B, Al-stainless steel in the process of thermal cycling (USSR).	3. Investigation of residual stress effect on the mechanical properties of composite materials by diffusion welding (Cu and Mo, Cu and W, Al and Ti).
